

RBC Emerging Markets Bond Fund (CAD Hedged)

Investment objective

To provide total returns comprised of interest income and capital growth while minimizing the exposure to currency fluctuations between foreign currencies and the Canadian dollar. The fund invests primarily in government debt securities of emerging market countries and may also invest in emerging market corporate bonds and government debt securities of developed countries. The fund may do so either directly or indirectly through investment in other mutual funds managed by RBC GAM or an affiliate. The fund will also use derivatives to hedge against the fluctuations in the value of foreign currencies relative to the Canadian dollar.
